ABSTRACT

This report presents retention and graduation patterns of full-time undergraduate students at Maryland's public four-year colleges and universities from 1980 to 2000. It focuses on the number and percentage of students who were retained at their original campuses and those who graduated from any senior public college or university in the state. Two institutions that do not enroll first-time freshmen are excluded, as is the University of Maryland University College, which has a mission to serve the adult, part-time population. Data show that the second-year retention rate of all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 81.5% for the 2000 cohort. The second-year retention rate for African American students was below that of other students and was the lowest for this group since the 1991 cohort. Female students are more likely to re-enroll that male students are. The 6-year graduate rate for the most recent cohort of all new full-time students is at an all time high at 58.4%. The 6-year graduation rates for African Americans and Hispanics are significantly below the rates for whites and Asians. Information is given about the graduation and retention at individual institutions, and tables show statewide trends in retention and graduation. (Contains 7 figures and 58 tables.) (SLD)

Introduction

This report contains the retention and graduation patterns of full-time undergraduate students at Maryland's public four-year colleges and universities from 1980 to 2000. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.[1]

The retention rate for the entering class of 1996 and beyond includes changes resulting from the development of the Federal Graduation Rate Survey (GRS) and from recommendations of an intersegmental workgroup appointed to advise the Commission on this subject. GRS is part of a federal initiative to collect data necessary to prepare reports required by the Student Right-to-Know Act of 1990. There are some differences between the calculations from previous years beginning with the 1996 cohort:

- Include retention rates of all first-time undergraduates and not just first-time freshmen.

- Students who are enrolled at multiple institutions are included more than once in the cohort. In the past, these cross-enrolled students were reported at only one campus on a randomly selected basis.

- If an institution reports a new social security number for a student, the student is now tracked on the basis of the new number. In the past, these students were treated as having dropped from the institution. The impact of this change will be greatest at institutions with a large number of foreign students, who are often assigned "dummy" social security numbers when they initially enroll.

- The method used to match student enrollment and degree attainment will be based on the federal GRS procedures and on the recommendations of the GRS workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland's data resulting from GRS.

[1] The University of Baltimore and the University of Maryland, Baltimore are excluded because they do not enroll first-time freshmen. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

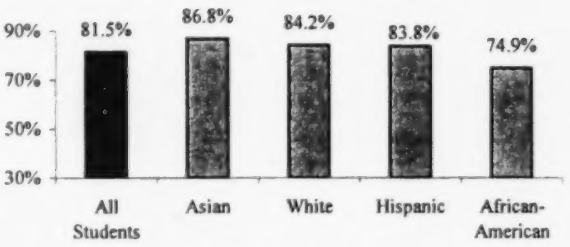
Findings

Second Year Retention Rates: Statewide

- The second-year retention rate of all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 81.5 percent for the 2000 cohort.

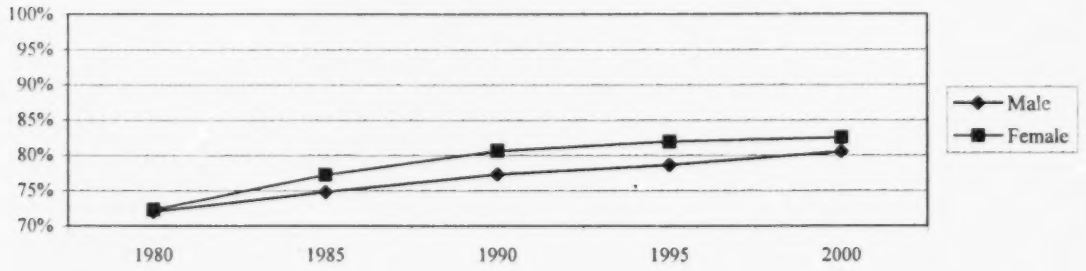
- The second-year retention rate for African-American students (74.9 percent) was below that of other students and the lowest for this group since the 1991 cohort.

Figure 1
Second Year Retention Rates
2000 Cohort



- Female students are more likely to reenroll than male students are. The second-year retention rate of first-time full-time female students was 82.5 percent for the 2000 cohort compared to 80.5 percent for first-time full-time male students. Female students have always exceeded their male counterparts in second year retention since the Commission began collecting these figures.

Figure 2
Second Year Retention Rates by Gender
2000 Cohort



Six-Year Graduation Rate: Statewide

- The six-year graduation rate for the most recent cohort of all new full-time students is at **an all time high** at 58.4 percent. The six-year graduation rates for African-Americans and Hispanics are significantly below the rates for whites and Asians.

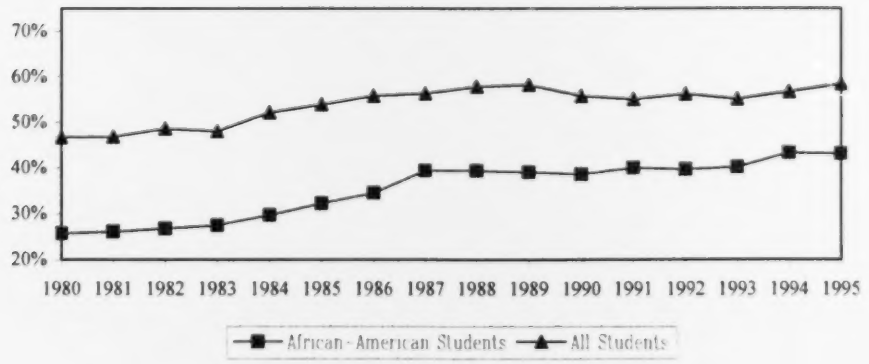
Figure 3
Six-Year Graduation Rates
By Ethnic Background

Ethnic Background	1980	1985	1990	1995
All Students	46.7%	53.9%	55.8%	58.4%
African-Americans	25.7%	32.2%	38.6%	43.1%
Asians	52.6%	62.5%	65.0%	68.1%
Hispanics	39.5%	54.3%	50.7%	52.1%
Whites	53.4%	60.6%	64.5%	67.1%

Source: Maryland Higher Education Commission Enrollment and Degree Information Systems.

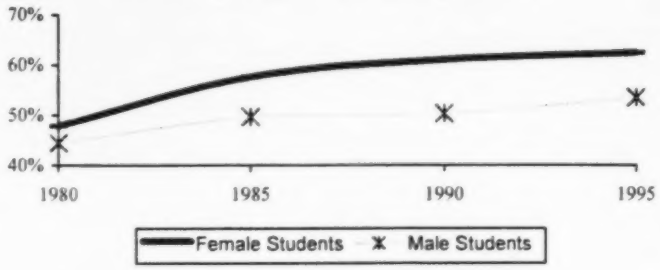
- Although the six-year graduation rate for full-time African-American students has consistently lagged behind that of all students and other ethnic groups, this gap has narrowed since 1980 when only 25.7 percent of African-American students graduated.

Figure 4
Six Year Graduation Rates
African-American Students and All Students



- Women are more likely to graduate in six-years than men. The six-year graduation rate of female students for the entering class of 1995 was 62.4 percent. In comparison, just 53.5 percent of male students in the 1995 cohort graduated in this period. The six-year graduation rates of women have always exceeded that of men.

Figure 5
Six-Year Graduation Rates: By Gender

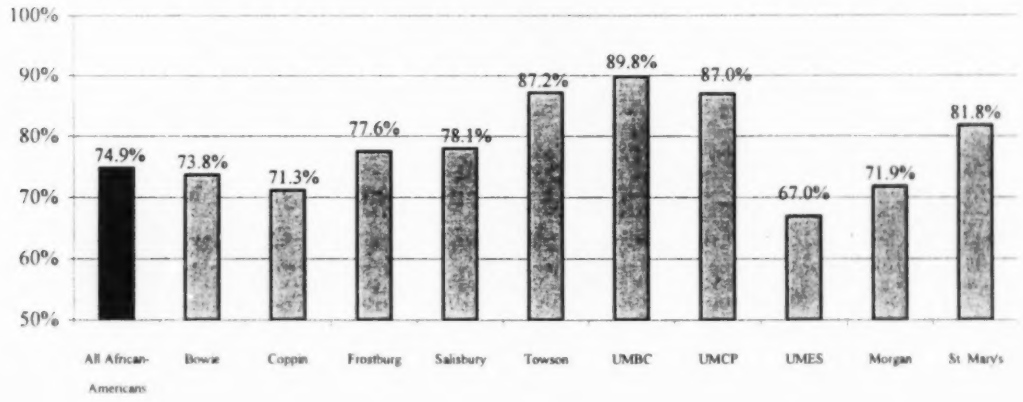


Second-Year Retention: By Institution

- The second year retention rate of the 2000 cohort at University of Maryland College Park (90.8 percent) exceeded all other public four-year institutions.

- The second year retention rates of African-American students in the 2000 cohort at three 'traditionally white' institutions (Frostburg, Towson and University of Baltimore County) surpassed the rates of students of **all** races at these campuses.

Figure 6
Second Year Retention Rates of African-American Students
2000 Cohort

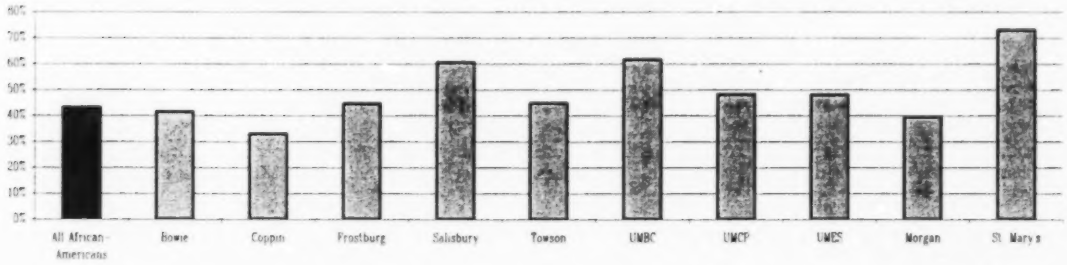


Six Year Graduation Rate: By Institution

- The four-year public institutions with the greatest six-year graduation rates for the entering class of 1995 were St. Mary's (77.6 percent), Salisbury (73.9 percent), UMCP (64.8 percent) and Towson (64.5 percent). Salisbury's graduation rate was the highest ever achieved by the institution. University of Maryland Eastern Shore also set a new record with six-year rate of 47.3 percent.

- The four-year public institutions that had the greatest six-year graduation rates among African-Americans in the 1995 cohort were St. Mary's (73.0 percent), University of Maryland Baltimore County (61.7 percent), and Salisbury (60.6 percent). **The six-year graduation rate of African-Americans at UMBC was greater than that for whites**.

Figure 7
Six-Year Graduation Rates of African-American Students
1995 Cohort



- Institutions with the highest six-year graduation rate among women were St. Mary's (75.6 percent), Salisbury (75.5 percent), UMCP (69.9 percent), and Towson (69.5 percent).
